

Digital Check-In is available at Hilton Myrtle Beach Resort & Embassy Suites Myrtle Beach Resort

What is Digital Key?

Over 1,000 Hilton properties now offer Digital Key. Digital Key is an option for Hilton guests to use their smartphone or iPad to open any door that would regularly be opened with a key card. Through the Hilton Honors application, guests can check-in before arrival and skip the front desk altogether.

How does it work?

The option is available to Hilton Honors members. Joining [Hilton Honors](#) is free and easy to join. Through the [Hilton Honors app](#), guests can check-in through the app and even choose a room before arriving. Where available, guests then have the option to choose a Digital Key.

On the day of arrival, the Digital Key will be available once the room is ready. When the smartphone is in range of the selected room, a signal is sent through Bluetooth to unlock the room. The registered guest then clicks on the button in the Hilton Honors app to unlock the room. No need to stop at the front desk, just head straight to relaxation!
